Hi Lou – Attached are the revised IAR and AR review emails relevant for GAO. The network drives are not working so I had to attach all the files to this email.

Ok. We may have to talk for minute just to make sure we are on the same page.

In the meantime, I'm circulating a QA'ed version of the table. At Vicki's request, I double checked all the links and dates. All the dates in green and bold are accurate. I wasn't involved with the IA review process prior to May so I can't confirm the redline dates for RDX and TBA. Other than that, everything should be correct at this point.

I've left in the ERC rows, but we can always remove them later.

No.

It's already beyond what we've requested.

Can we push the outlook to January 2017 (i.e., December 2015 – January 2017)?

Vicki, Dahnish, and Gina...can you guys decide on the best estimated dates for EtO, BaP, ETBE, and TBA, dates that you are comfortable with for the future releases/submissions and then let us know.

Looking at it for formatting — it was weird that there were steps listed for some things and not others. But maybe not.

12/22 was the date for EtO. BaP was 1/17 in the current dashboard

Also the dates for TBA and ETBE were different on the current dashboard. TBA was in November (11/8) and ETBE was January (1/17)

THOUGHT I HAD ALREADY SENT THIS BEFORE SENDING MY LAST EMAIL IN RESPONSE TO LOU...

Ok, thanks!

I originally didn't want steps on the ERC because its an internal process that we added but I'm rethinking so, thanks for adding.

Thanks for correcting the ammonia and RDX dates. Are we sure about the BaP and EtO dates? If BaP is clearly going to be in January, I'd rather go ahead and say it.

We'll also need to update the website, where applicable. I suppose that's a different conversation ☺

Lou and I are discussing the addition of the Report to Congress.

Thanks...if others see anything let us know (sorry to harp on it, but this has to be accurate!). If I don't hear anything over the next couple of hours, we'll clean this one up and send over.

Ok I've made some updates to this (attached). See changes in Red.

Other changes – ammonia – changed to 9/20

RDX changed to 9/23

EtO and BaP changed to 12/22

All blue – I couldn't verify because these weren't on my calendar. I forgot to mark the date on 4/29 – I wasn't able to verify that date either. I don't have the email.

Do you want to add 12/10 – IRIS Progress Report and Report to congress?

Hi all,

I've added to and edited the table that Dahnish circulated last week. Can you guys QA it? If there is anything to add or change, let me and Lou know. Vicki, I saw your comment about the stakeholder meetings, looks like in the timeframe that we are looking at (Dec 2015-Dec 016) we had two on chromium and one on chloroprene, and we are about to have one on formaldehyde. I am generally ok but still contemplating if we should add those. It does show transparency.

I'll be working from home in the morning but hope to be in the office before noon. I've tried to make the table as self-explanatory and straightforward as possible while minimizing the use of acronyms, except with chemical names. This was done because the GAO analysts will be looking for evidence of planning, consistency, transparency, and accuracy in our activities. Feel free to add to the table or make edits, I just ask that you be consistent with the approach that is shown in the attachment.

Thanks all! This will be a huge demonstration of IRIS' progress for GAO to take into consideration in the High Risk listing.

Samantha
